Título: Integrated Care in Finland: ongoing transformation of governance, funding and service structure

Autor: Dr Linda Soikkeli

Con el apoyo / Amb el suport:

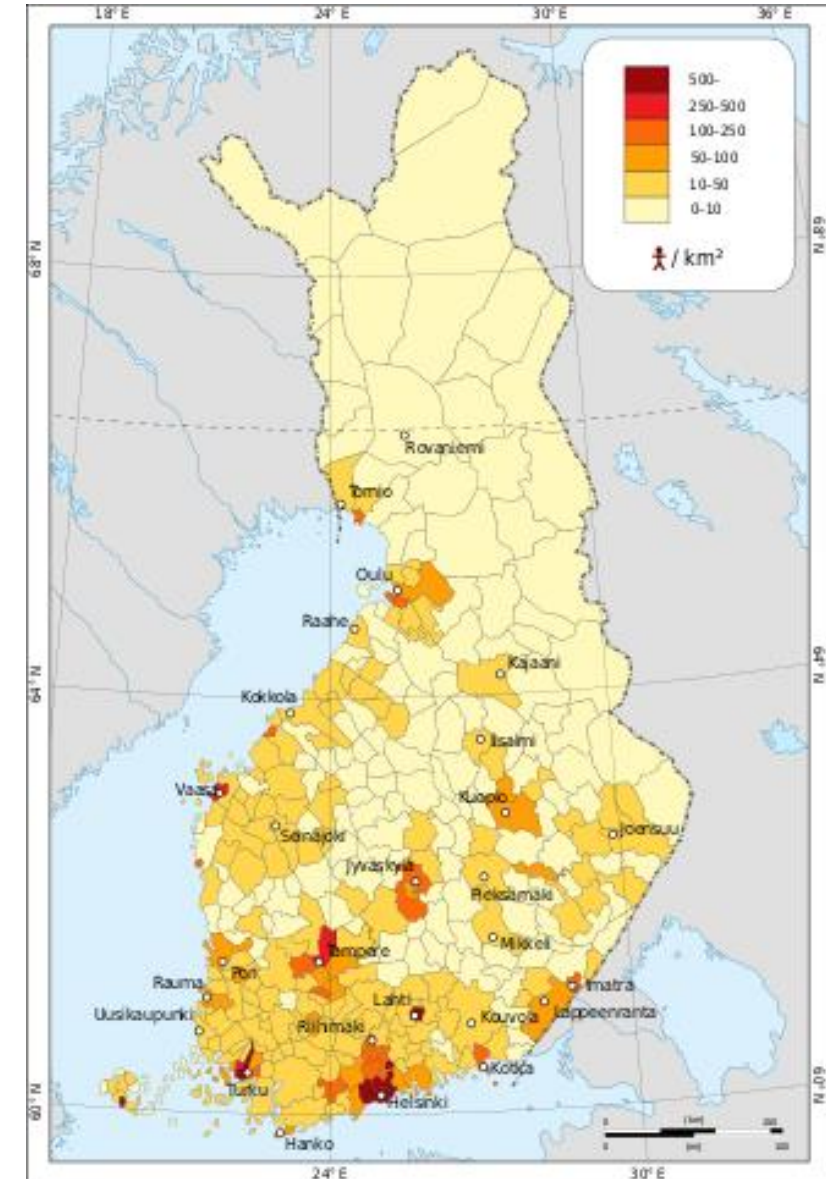

Structure of presentation

- Overview of Finland
- Challenges facing Finland
- Structural transformation
- Funding and governance transformation
- Service transformation

Overview of Finland

- **Eight-largest country in Europe**
 - Area: 338,424 km²
- **Most sparsely populated EU country**
 - Density: 16 / km²; Population: 5,549,807
- **Parliamentary republic**
 - 309 municipalities
 - 1 autonomous region (Åland Islands: population 30,000)
- **Greater Helsinki metropolitan area**
 - Over 1.4 million people
 - Produces 1/3 of the GDP (USD 299 billion ~ USD 48,937 per capita)
- **Finnish health care, social care and social security** is an OECD “miracle” from the past 100 years

Challenges facing Finland and many other countries

Sustainability of
public finances

Sufficiency and
availability of competent
personnel

Finnish welfare model:
effective and economically
sustainable with
well-functioning foundations
(by international standards)

Inequalities among the
population

Growing need for
healthcare and
social welfare
services*

Integrated policy

- The Ministry of Social Affairs and Health is responsible for the planning, guidance and implementation of health and social policy in Finland
- The Ministry of Social Affairs and Health safeguards people's functional capacity, livelihoods and services.

Kaisa Juuso

Minister of Social Affairs and Health

Sanni Grahn-Laasonen

Minister of Social Security

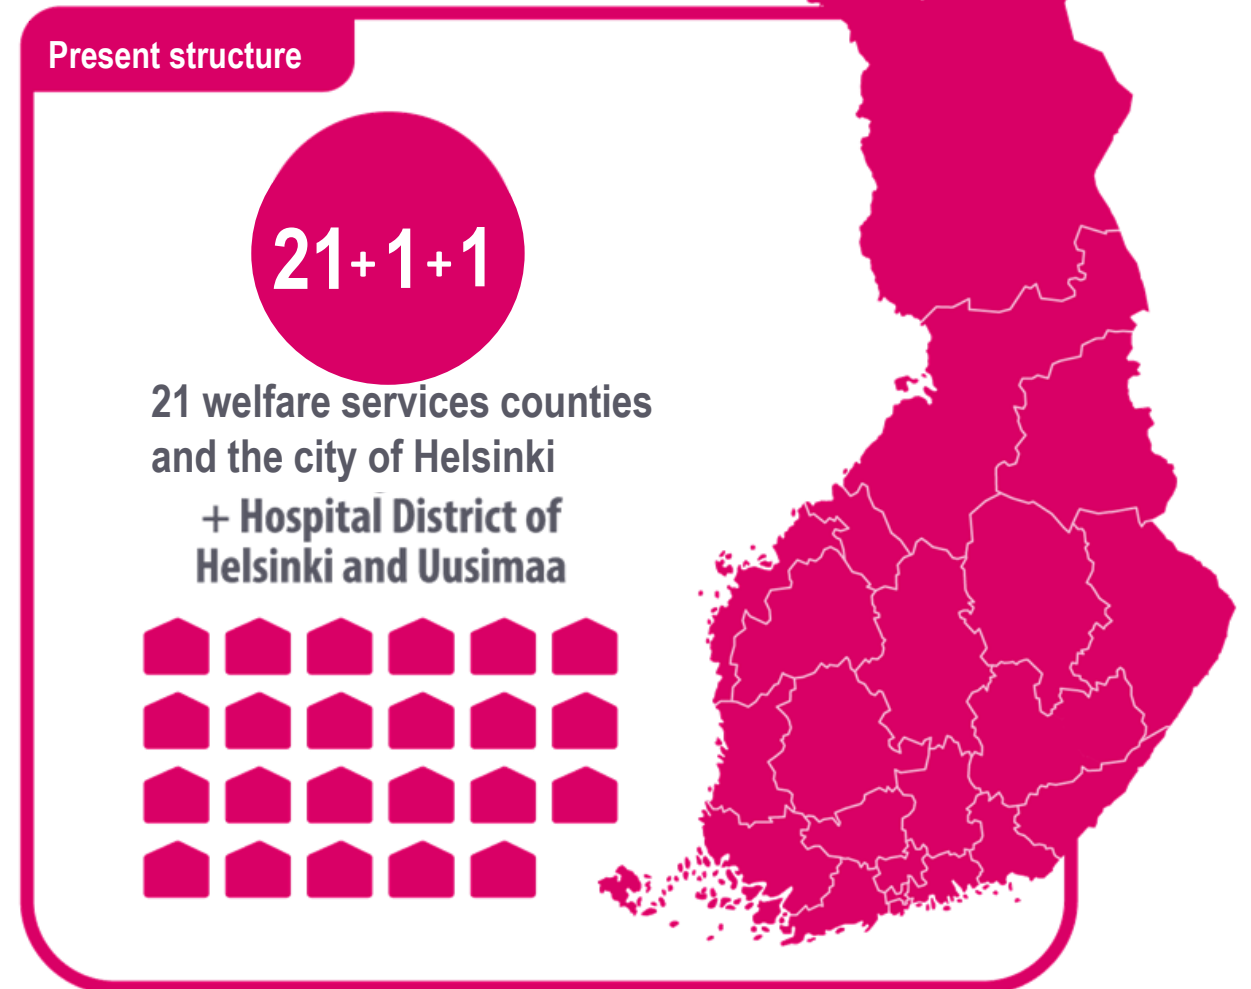

Arto Satonen

Minister of Employment

Integrated organization

- Smallest municipality: population of 111
- New Wellbeing services counties: population of 68 000 - 660 000

- The wellbeing services counties are bodies governed by public law that exercise autonomy within their own areas.
- The highest decision-making body in each wellbeing services county is **a county council**, which **consists of 59–89 elected representatives**.
- The other statutory bodies are the county executive, the audit committee, and the national language board.
- Wellbeing services counties have 4–6 management levels, including the county chief executive.

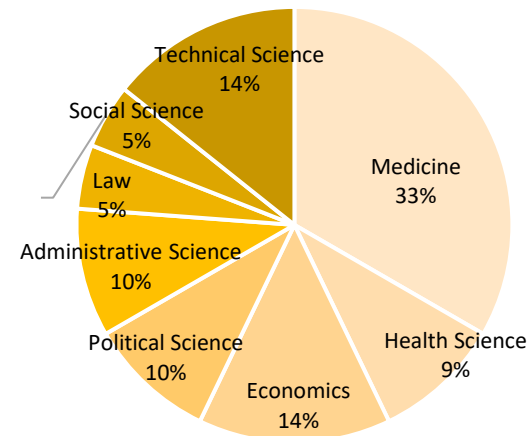

Who are the 21 county chief executives?

negotiations and other
interaction

Integrated objectives and monitoring

NATIONAL OBJECTIVES

Yhdenvertaisuus	Kustannusvaikuttavuus	Yhteistyö
1. Selkeytetty palvelujärjestelmä, palveluverkko ja palveluohjaus lisäävät peruspalvelujen saatavuutta, jatkuvuutta ja yhteensovittamista.	3. Kustannusten kasvua hidastetaan sosiaalisesti kestäväällä tavalla suhteessa palveluntarpeen kasvuun.	5. Hyvinvointialueiden ja kuntien sekä muiden toimijoiden välillä on toimivat yhteistyörakenteet, joissa panostetaan vaikuttavaan ennaltaehkäisyyn.
2. Sote-henkilöstön riittävyyden, saatavuuden ja pysyvyyden varmistamiseen on luotu edellytykset.	4. Toiminnan ohjauksessa ja johtamisessa painotetaan vaikuttavuusperusteisuutta.	6. Joustava ja kriisinkestävä palvelujärjestelmä turvaa väestön terveyttä, hyvinvointia ja riittävää toimeentuloa koko maassa.
Tieto ja tutkimus		
7. Palvelujärjestelmän sekä perusterveyden ja sosiaalihuollon palveluihin liittyvä tutkimus- ja kehittämistoiminta vahvistuu.	8. Kansallisesti ja yhteistyöalueilla suunniteltu tiedonhallinta ja digitalisaatio tukevat tavoitteiden saavuttamista ja asiakaslähtöistä toiminnan uudistamista.

Integrated social and health care

Now

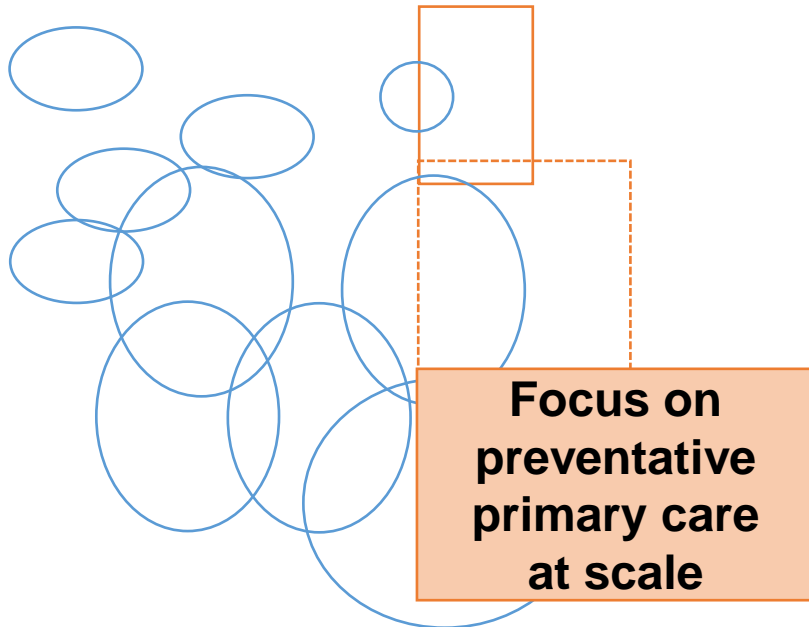

Future

Social care

+

Health care

Fully Integrated social and health care system

Integrated and personal care coordination

Community services: Limited social and health care resources can stretch further when all society and community resources are utilized (incl. municipalities (incl. health, social welfare and safety promotion, sports, culture), businesses, civil society organisations). The future care system extends beyond traditional social and health care services.

Client/
patient

Personal contact

Digital or physical: **Assessment of need for care or services and care plan**

Cross-sector
integration

Horizontal integration and continuity of care

Primary
services

Comprehensive primary care services for people of all ages primarily by own family doctor or nurse

Not urgent need/out-of-hours or emergency

If needed: named multi-disciplinary team of specialists supports in a tech-assisted manner

- Services for children, young people and families
- Occupational health, social care, comprehensive rehabilitation, mental health and substance abuse services, oral healthcare
- Senior centre

Tertiary
services

Vertical integration

If needed: referral and collaboration

Specialized services (e.g. hospitals, diagnostics, assistive equipment) are centralized physically or virtually either at county-, area- or national level based on the needs of the local population, the resources realistically available and outcomes-data

Case example: Integrated care within elderly care setting

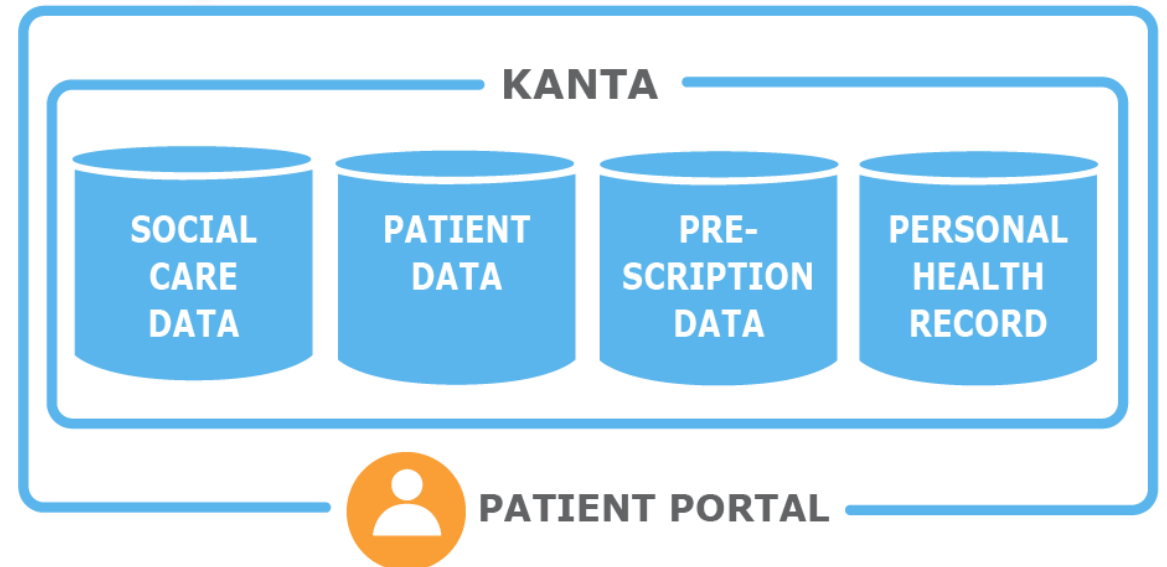

- Home care is by nature a joint service of social and health care: **home care refers to a service that ensures that a person can perform the activities of everyday life in their home and living environment.**
- In order to improve client and patient safety, new legislation (1.1.2024) will improve access to information in joint social and healthcare services, e.g. by a joint data register for social services data and health care data. For example, the availability of home care information to the health center and hospital, and vice versa, will be improved.

Case example: 100% electronic medical records (Kanta)

- Patient, social care and prescription data gathered in a national databank.
- Healthcare professionals can access the needed data nationwide, store patient records and make prescriptions.
- Citizens can browse own medical records and prescriptions and order repeat prescriptions in the online service.

KANTA is an entity of digital services, which brings benefits for citizens, pharmacies and the social welfare and healthcare sector

Gràcies!
